1	Active Energy received for 66 KV BHILDI(HET)(BABRA-1)S/S wind Farm pooling at interface point of substations is computed by 66 KV NANAMACHİYALA by summation of net energy recorded in Special Energy (ABT) meter in every 15 minute basis. The detail computation of active energy is carried out by SLDC and block wise computations and meter data is published on website.
2	Reactive energy supplied to Wind Farm pooling substation 66 KV BHILDI(HET)(BABRA-1)S/S S/S is computed as per the conventional tariff meters. The detail computation of reactive energy is carried out by GEDA and circulated by them to all wind owners in advance.
3	Share of wind Farms in the electricity received at interface point from 66 KV BHILDI(HET)(BABRA-1)S/S S/S is computed by GEDA on the basis of energy generation recorded on each wind energy generation during the period specified as above.
4	After careful consideration of various representation received before SLDC-Gujarat, SLDC has issued this statement for immediate period to circumvent difficulties faced by various wind owners. This will be continued till the received mechanism is in place. The any change in procedure will be communicated separately.
